DETAILED ACTION

Remarks

1. In response to applicant's Appeal Brief, dated March 23, 2004, the examiner has re-reviewed the prior art in light of applicant's arguments as to the patentability of claims 1-81. The applicant has made the argument that the examiner has misconstrued the claim term "oil content." The applicant notes that the term "oil content" has been defined in the specification to mean "the amount of oil present in a sample." Further, the applicant makes the argument that the examiner has equated the terms "oil" and "triglyceride". The applicant notes that one skilled in the art would recognize that "oil refers to more than just total triglycerides and includes components such as free sterols, sterol esters, free fatty acids, mono and di-glycerides, tocopherols and some phospholipids." (emphasis added by applicant) The applicant further notes that "the determination of total oil content in accordance with the present invention takes into account all of these components." The examiner has considered the applicant's arguments as to the deficiencies of Bergqvist and withdraws the rejections set forth in the Office Action mailed September 18, 2003.

Allowable Subject Matter

2. Claims 1-81 are allowed.
